OVERVIEW

Strategist and Innovative Tech enthusiast with over 7 Years of Experience including Project Management and Quality Assurance (QA) aiming to help organizations to deliver Quality products. Hands on experience in SaaS products, E-commerce, FRM FinTech and Gaming domains with a track record of delivering impeccable software quality and interfacing directly with satisfied clients has equipped me to plan and develop robust SQA solutions.

- 3 years of experience in delivering projects for fortune 500 companies.
- 4 Plus years of experience as QA Engineer, with good understanding of SDLC, Agile and STLC process.
- Hired, trained, managed, and mentored the development teams resulting in effective integration of processes.
- Developed Innovative strategies and streamlined processes with development activities to reduce technical debt.
- Successfully managed a diverse range of projects from conception through implementation.
- Collaborated and established periodic requirement reviews by stakeholders to ensure requirements were well defined that lead to delivery of flawless applications in production.
- Analyzed business requirements, conducted training sessions, estimated project scope, and worked closely with development team to deliver high-quality software solution.
- Expertise in performing End to End Test Management, project coordination and defect management & tracking.
- Good understanding of Test coordination/QA and requirement gathering /analysis & Business Processes.
- Expertise in review of requirements, specifications and technical design documents and translate into test cases.
- Expertise in coordination with Production support team and development team for production implementation.
- Exceptional in communication skills and public speaking, ability to work under stressful conditions and to meet goals in short deadlines.

Project Experience Summary

Company /Client & Duration	Role	Projects
VisionX Technologies Dec 2018 – To date	Engineering Manager Assoc Product Manager Sr. QA Engineer	Staples Dotcom (B2C) Staples Business Advantage (B2B) Staples Reorder (Inventory restocking app) Staples BluPrint (Site Assessment tool) Staples Search MacDonald's Menu Manager (internal tool to automate manual processes and improve efficiency in managing, publishing, and updating menu variations.) PackageX – Mailroom (B2B)
Broadpeak Technologies Jan 2016 – Nov 2018	Sr. QA Engineer QA Engineer	Naranga, NCompass (FRM FinTech)

ADZA Digital Nov 2016 – Feb 2017	Lead QA	Parkey (App for finding parking spots in UAE)
we.R.play Oct 2015 – Nov 2016	QA Engineer	War dragon
Beaconhouse School System Feb 2015 - Oct 2015	IT teacher	Teaching computer sciences to O Level / Matric
COMSATS (CIIT) April 2014 – Aug 2014	Research Internee	Worked on CERN project

Roles & Responsibilities

Employer	VisionX Technologies, Islamabad
Role	Engineering Manager
Responsibilities	<ul style="list-style-type: none"> Developing product strategy and roadmap using input from customers, internal stakeholders, and competitive analysis. Working with development leads so that product requirements are understood. Ensuring that implementation plans match expectations. Responsible for defining guidelines for QA POD. Provide technical guidance to junior QA's and perform code reviews. Responsible for end-to-end delivery on system. Mentoring members of the team.
Role	Associate Product Manager
Responsibilities	<ul style="list-style-type: none"> Defined product scope, goals and deliverables along with product owners. Produced effective technical documentation of the product. Tracked and reported on the status of products to internal and external stakeholders. Ensured that all elements of a project are executed accurately and within time. Escalated issues when necessary. Precisely estimated and meet deadlines. Identified risks and roadblocks that may hinder a delivery.
Role	Senior Quality Assurance Engineer
Responsibilities	<ul style="list-style-type: none"> Established formal QA processes, ensuring that the team is using industry-accepted best practices. Established QA Automation framework along with on-shore team and automated use cases. Acting as key point of contact for all QA aspects of releases, coordinating QA resources internally and externally. Leading and mentoring QA team members. Developing and executing test cases, scripts, plans and procedures (manual and automated).
Employer	Broadpeak Technologies
Role	Senior Quality Assurance Engineer
Responsibilities	<ul style="list-style-type: none"> Checking and reviewing QA artifacts.

	<ul style="list-style-type: none"> • Maintaining and improve Automation framework and added new test cases to improve coverage. • Attending the regular client calls and discussing the weekly status with the project leadership team. • Participating in enhancement of developed testing processes, procedures, and methodologies
Role	Quality Assurance Engineer
Responsibilities	<ul style="list-style-type: none"> • Solved problems related to the use and implementation of performance test automation tools. • Designed, developed, executed, monitored, analyzed and maintained performance test scripts and test solutions for various platforms. • Collaborated with appropriate technical teams to complete root cause analysis. • Planned and developed Test Automation Strategies. • Build Test Automation framework from scratch. • Performed complete Feature Conformance tests and Basic Acceptance tests to ensure stability of the product.

Employer	ADZA Digital
Role	Lead QA
Responsibilities	<ul style="list-style-type: none"> • Defined quality standards and metrics for the product. • Partnered with project manager and technical lead to review product documentation and determine testing strategy. • Designed, developed and executed test cases, scripts, plans and procedures. • Communicated and interacted with appropriate areas on problems, changes and enhancements that may impact data, workflow and /or functionality within the product.

Employer	we.R.play
Role	Quality Assurance Engineer
Responsibilities	<ul style="list-style-type: none"> • Participated in design and development of test instructions and procedures. • Worked in collaboration with the client's onshore team on Automation projects and ensuring quality of their products. • Implemented different testing techniques i.e. system, regression, integration and performance on different platforms. • Worked as a part of team using Agile Development Methodologies.

Employer	Beaconhouse School System
Role	IT Teacher
Responsibilities	<ul style="list-style-type: none"> • Taught Introduction to Computer Sciences courses. • Planned, prepared and delivered lessons. • Presented lessons in a comprehensive manner and use visual/audio means to facilitate

	<p>learning.</p> <ul style="list-style-type: none"> • Provided individualized instruction to each student by promoting interactive learning. • Developed and enriched professional skills and knowledge by attending seminars and conferences etc.
--	--

Employer	COMSATS Institute of Information Technology
Role	Research Internee
Responsibilities	<ul style="list-style-type: none"> • Studied about cluster, grid and cloud computing. • Worked on Linux commands and perform multiple tasks. • Worked on CERN project and configure EMI3 middle ware on worker node. • Configured storage element for CERN project. • Used Latex and WinEdt for technical writing. • Learned how to develop a Cluster. • Worked on MPI programming. • Worked on an Efficient Network Traffic Management System Using Load Balancing Algorithms.

Certification

Name	ISTQB - CTFL
Year	2018
License No	License # 18-CTFL-0204-PK

SKILLS

Domain	E-Commerce (B2B & B2C) products, FRM FinTech and Gaming Industry.
Methodology	SDLC, STLC, Agile, Waterfall.
Tools & Technologies	Selenium, TestNG, JUnit, JAVA, PyUnit, Python, JMeter, Blaze Meter, BrowserStack, Git, Gitlab, Confluence, TestRail, Postman, JIRA, MTM, Azure DevOps.
Operating System	Windows, MacOS, Linux.

Education

Degree	Year	University
BACHELOR'S IN COMPUTER SCIENCES	2010-2014	COMSATS Institute of Information Technology (CIIT)
